

WELLING NEWS

by Mrs. E. K. Bullock

Mr and Mrs. E. K. Bullock had as guests Saturday Mrs. Claude Duncann of Lethbridge, and Mr. and Mrs. W. G. Leonard of Spokane. Mr. and Mrs. Leonard were former residents of this district.

Mr and Mrs. Morris Bullock of Barnwell and Mr. and Mrs. Al Bullock of Welling left Wednesday for an extended trip thru Minnesota, N. Dakota and Iowa. While gone Mrs. Al Bullock will go to Mayo Bros. at Rochester for treatment.

Mrs. Kate Wilde and daughters Dorothy and Mildred have gone to Waterton for a few days.

A party for Sunday School workers was held at the home of A.A. Wilde Monday night. A very enjoyable time was had.

Mr. and Mrs. Ray Bullock left today for Banff, with their family. They are expecting to stay a week. Mr. and Mrs. Deen Wilde and family are also going to Banff.

A number of people went from here to the Lethbridge parade and Stampede. The parade was colorful and lengthy. The crowd was enthusiastic over Gene Aury. He was very friendly and unassuming. Between events at the Stampede he spoke a few words of thanks for his welcome by Lethbridge and sang three songs. There was a dense crowd around him asking for autographs.

Mr. and Mrs. Leonard Meheew and family are attending the Calgary Stampede. They were also in Montana a few days.

Andrew Erickson and family from Montana visited his parents Mr. and Mrs. Alfred Erickson over the weekend Mr Erickson is having dental work done in Lethbridge.

The latest report on the Clothing Drive adds 133 pounds of serviceable used clothing to that already collected. This makes 3460 pounds in all. A very useful amount of generous aid going where it will be very much appreciated.

Credit Union Secretaries Receive Praise

In common with many people of the town your cub reporter is a member of the Raymond Community Credit Union. While perusing a bulletin (the Recorder office receives them regularly) I came across a couple of local interest. The bulletin was in regards to the results obtained by the Credit Unions of Southern Alberta.

To quote: When one has visited the Raymond District Credit Union, one is struck by the courage and determination of their secretary Mr. R. Larson. He took over when no one else offered, he had no experience but keeps a fine set of books. Men like him in the movement helps the cause. We did not have the pleasure of meeting their officers, but, if they can match the treasurer in zeal and willingness this credit union should go places."

—and also from the same bulletin:

"While in Raymond we had only the opportunity for a momentary chat with Mr. C. O. Nalder of the Social Makers Union at this point. Mr. Nalder is still keen and he was sorry we could not look his books over, so were we, for we always come away feeling the better for a chat with 'Cliff' and some of the officers. of this real credit union, which has always been the case when we have visited them. Having no car deprived us of this pleasure this time as trains or buses will not wait to enable us to do many of the things in the interest of the movement we should like.

The foregoing were quotations from the "Credit Unions", issued by the Credit Unions activities branch.

Here and There

It has been heartening to see the number of veterans who are going back to University. Prep schools have been crowded. It has been interesting to see how fast these young men could learn when they had a purpose. The experiences of war have sharpened their interest in education so that schools and Universities all over this continent are crowded. Veterans are taking courses at such famous girls schools as Vassar.

These vets have that one quality so rarely found in students, they want to learn. On the whole they are far more tolerant than the average person. They are unusually well informed on and interested in world affairs. Some, from experience find history and literature meaningful. As a whole, their attitudes toward religion and life are very sensible.

Ilya Ehrenburg, Russia's most famous war correspondent came to Canada and United States where he was given a free hand. For nearly three months he roamed our countries and before going home last week wrote his "Impressions."

To one brought up the communist way, his writing were what you might expect: Tennessee, he noted, bars Darwinism; Russia forbids anti-Jewish propaganda. "What is better," "to prohibit the theory of evolution, or the practice of the counter revolution?" American newspapers deplored the denial of notes to the Jugoslav collaborationists while in Mississippi, half the population (negro) is deprived of the vote. "What is better: to deprive a man of the right to vote who has a black conscience or one who has a black skin?"

He took similar digs at Canada. The only thing North Americans wish is that Russia would turn our newsmen loose to paint the real picture of Russia.

In 1940 Canadian civilians lost nearly \$23,000,000. through fires. In 1945 this had increased to \$42,000,000., a startling increase. If you are one of those people who think that nobody loses when the property is insured, you should do some more thinking.

The largest number of Canada's 55,173 fires last year were caused by careless smokers. Overheated stoves, furnaces etc. came next. After checking the various causes of fires it appears that a rigid annual inspection of heating appliances, chimneys, etc. should be made. What are we going to do

Popular MYRTLE CAMPBELL, middle member of the three Campbell sisters has been singing her way through fall, winter and spring on top CBC programs. She is now engaged in summer singing with the Jack Allison show, broadcast daily over the Trans Canada network, Monday to Friday at 6 pm. CDT.

CARD OF THANKS

We wish to express our appreciation of the many kindnesses and expressions of sympathy so generously proffered in our recent bereavement.

Dr. D. F. McPherson
Mr. and Mrs. N. C. Morton

Doug Paxman Heads A. F. U. Local 390

At the recent fairs meeting, held July 9th in the second ward, Douglas Paxman was elected to head A.F. U. local 390. To support Mr. Paxman in his role as president, Ray Depew was elected as first vice president with Ellen Winkler as second vice president. Directors elected were as follows: D.A. Bennett, T.W. Meldrum, Jack Evans and Geo. Sarawalri.

Speakers at the meeting were Ken Lang and Mr. and Mrs. Pharis.

The local has 171 paid up members. A good turn out was reported, but some members were unable to attend because of the rain, and some were away on holidays.

Strike action was unanimously voted in case no agreement could be reached with the government.

On Wed. evening, the executive met and elected Mrs. Manilla Meldrum to act as Sec. Treas. of the local.

The farmers of the Raymond district are now fully organized, and the organization culminates the hopes and hard work of some of the farmer citizens to get an organization under way in this district.

Southern Alberta Tennis Tournament To Be Held

For the first time since 1942 the Southern Alberta Tennis Tournament will be held July 19-20-21 in Lethbridge with the Lethbridge Tennis Club acting as hosts to racquet wielders from Alberta, the Kootneys and Montana, on the south.

The Southern Alberta Tournament should stimulate interest in the game provide tournament experience and a test for aspirants to provincial honors in the provincial tournament which opens in Calgary on July 22, and every effort is being made by the Lethbridge Tennis Club to make the tournament a success and assist those from outside in taking part.

Accommodation will be provided in the homes of the club members with hotel reservations made for those who desire them. Entries should be mailed as soon as possible to Harold Kay, tournament chairman, 623-9th St. S., Lethbridge (Phone 2226), or to Wm. (Countdown, Tip Top Tailors, Lethbridge, (Phone 2232).

Both drama producers and radio actors think that the name Budd Knapp is synonymous with the best in professional radio acting. In Toronto since 1941, the Ottawa-born Knapp has starred in every kind of radio play from children's fantasies to the "Johnny Home" show and stage 46, and it takes a keen ear to identify him in his diverse characterizations. Among Knapp's current roles is that of "Shorty" in the Monday night broadcasts of "Science a la Mode" on the CBC Dominion network at 9:30 p.m.

Paratrooper F. H. Smith, last son of SB Smith to return from overseas left last week to attend Summer School in Edmonton, continuing his studies preparatory to entering the University of Alberta, where he plans to major in the speech arts. While in England he spent 8 months at the Khaki University at Willington House, part of the London University.

His brother, Thurston, also expects to enter the U. of A. where he hopes to major in Agriculture. Another brother, Tennyson, who has just finished a term at Brigham Young University in Provo, expects to take civil engineering at the U. of A. also.

Our First Aiders Did Well At Recent Stampede

It will be remembered that during the second day of the Raymond Stampede on July 2nd, three accidents occurred on the grounds.

No medical service was available on the grounds at the time because of an urgent case at the hospital being attended by both doctors.

However it was fortunate that two Senior First Aiders, namely, W. Van Orman and Arthur Atwood were on the spot. The former is a veteran Scout Leader and a well qualified being an inventor of the Versatile stretcher is also a good first-aid.

In such type of show as the stampede, chances of accidents are high. "Be prepared" is a good motto not only for boy scout. You know it was not raining when Noah built the Ark.

When "Wicky" and "Art" saw the Indian boy falling off the horse they "were ready" and rushed to the spot with Art having with him his versatile stretcher. They quickly diagnosed the injury of a fractured leg, treated and promptly picked up the injured on Atwood's stretcher, brought him on the stretcher in the car to the hospital where they unloaded the patient directly on the bed, demonstrating once more the great utility and convenience of Atwood's stretcher.

In the second case one of the contesting cowboys was thrown off the horse fracturing in the fall, one of his collar bones. Appropriate treatment was given again by Wicky and Art on the spot.

Finally in the third occurrence, the girl stepped on a sharp fragment of glass bottle sustaining a wound in her foot. This case was also well taken care of by the alert pair of first Aiders using materials whatever were found available through resourcefulness of the two.

The spirit and tradition of the St. John Knights is alive and active in our home town, thanks to a certain group of our fellow citizens and boys who are genuinely interested in first aid work and through it in "Service to Humanity" which is a motto of St. John Knights. Raymond First Aiders have been trained under the auspices of the St. John Ambulance Association.

This group of our first aiders are certainly entitled to a greater recognition and appreciation on the part of the town people.

In the light of the accidents described above it appears in order to make a suggestion to the Stampede Committee that a provision for organized First Aid during such public events as the Stampede should always be made and a squad of qualified First Aiders with necessary supplies be kept on duty during the performance. Such a suggestion may also be applied to any other large public gathering or event. I am sure that our First Aiders, if requested would be only glad to help in this regard.

Sincerely,
One of the Senior First Aiders of Raymond

Local Happenings

Reported by Elsie Mitchell

Mrs. Nensedy is enjoying a visit from her daughter and son in law, Mr. and Mrs. Geo Furryan of Los Angeles, California.

Mr. and Mrs. D. O'Connell have returned from their holiday at the coast.

The Child's Physiology Club met at the home of Mrs. Arla Gihh of Welling July 4th. The lesson, "Children and the Movies," was ably given by Mrs. Amy Allen. Mrs. Velma Redd assisted in serving a dainty lunch.

Mrs. Gordon Stone has arrived from overseas and was met by Gordon in Calgary where they spent a few days before returning to Raymond to make their home.

Miss Lura Redd, Art teacher at the Brigham City High School, is visiting here after an absence of six years. She was accompanied on her trip by her two aunts, Mrs. Rose Anderson, of Salt Lake and Mrs. Lilly Fransen of Price, also by her nephew, Eugene Schneider of Los Angeles, and her niece Miss Burt, of Salt Lake.

Mrs. Louis Brandley entertained at dinner Monday for her guests Mr. and Mrs. Merlin Steed of Glendale, Cal. and Mr. and Mrs. Albert Brandley of Stirling.

Visiting here from Los Angeles Cal. are Mr. and Mrs. Judd, parents of Mrs. John L. Allen.

Among those holidaying at Waterton are Mr. and Mrs. Jack Pittaway, Murray Wilde, Louis Schumers, Mary Henninger and Vonda Smith.

Mr and Mrs. R. W. Woolf had as their guests last week, Mr. and Mrs. Aaron Rose of Salt Lake City.

Mrs. Elizabeth Allen had as her guests last week, her sister in law, Mrs. Frank Hardy of Salt Lake, and a cousin, Mr. Willard Kimball of San Diego. Mr. Kimball, church coordinator there has done much in visiting service camps, along with Mr. Hugh B. Brown, formerly of Lethbridge.

Mr. and Mrs. Rayo Woolf are holidaying in Salt Lake.

Mrs. Will Hansen and Mrs. Will Rigby, sisters to Mrs. J. F. Salmon and J. H. Walker, are visiting here.

Mr. and Mrs. J.D. Brown accompanied by Mr. and Mrs. Bert Powelson and their small son left Thursday to spend a holiday in Vancouver.

Word was received here Tuesday of the death, in Paysen, Utah, of Chas. Depew, brother of the late Warren Depew. Mr. Depew made many friends here during his visits to Raymond. Ralph Depew left Tuesday by plane to attend the funeral.

Mrs. Willis and Mrs. Nelson left Tuesday for their home in Portland.

Mrs. Donna Meldrum entertained at a weiner roast Monday night in honor of Mrs. Bruce Galbraith.

"The Club," met Wednesday night at the home of Mrs. Laurel Van Orman.

Mr. and Mrs. Mel Depew and Mr. and Mrs. Winston Shaw, left Wed. for a holiday in B.C. and Waterton.

The ladies of the Raymond Muslo Club, and their partners, motored to the farm of J. LeRoy Anderson Monday, for a weiner roast. Games were enjoyed and a fireside program of stories and community singing.

Henry and Lyle Piegrass, accompanied by their wives, left Sunday to spend a holiday in B. C.

Mr. and Mrs. Wes McMullin and Mr. and Mrs. Boh McMullin and daughter Pat spent the weekend in Waterton.

Mrs. Howard Shoron and daughter of Drumheller are visiting her sisters Mrs. E. Gough, Mrs. P. McBride and Mrs. M. Heggie.

Mrs. Opal Wiggall is visiting this week in Calgary.

Mrs. Bert Leavitt nee Joyce Dahl, was honored Friday of last week at a shower in the second ward hall. More than 125 guests were present. A very enjoyable program was given which included a solo by Genevieve Jensen, piano duet by Lile Wing and Shirley Allen, novelty song by Helen Piegrass, a violin solo by Bernice Dahl accompanied by her sister Marie, duets by Kathleen and Merilyn Holmes, piano solo by Kay Allen and a solo by Mrs. Emma Burr. Out of town guests included Mrs. Ross Selmon and daughter Delores, of Picture Butte, Mrs. Elsie Turner, Lethbridge, Miss Audrey Nielson and Miss Audrey Tucker of Vancouver and Mrs. Relva Ross of Salt Lake City.

The new bride received many lovely and useful gifts.

Mrs. Barbara Zahriaki and son Richard of Provo, are visiting at the Frank Taylor home.

Mrs. Mona Stodge of Mackay, B.C. also arrived in Raymond Tuesday, and will spend some time here as the guest of Mrs. S.B. Card.

Wednesday evening, Mrs. F.R. Taylor entertained for her sister, Mrs. Zebrieki and Mrs. Hodge.

Mrs. Nephi Anderson, (Vilato Fairbanks), and three of her daughters, from Burbank, Cal. arrived Tuesday and will visit here for some time.

Mr. and Mrs. J. LeRoy Anderson report a very enjoyable trip over the weekend in Glacier and Waterton.

Born to Mr. and Mrs. Marcel Aneca a baby boy, Sunday July 7th.

Mrs. Louis Brandley entertained Saturday afternoon for her guest Mrs. Rolva B. Ross. A very enjoyable time was spent renewing old acquaintance with the honored guest. Mrs. Ross lived here several years before leaving to make her home in Salt Lake. She was a former librarian here.

Other out of town guests included Mrs. Mary Bryner of Price, Utah, Miss Lura Redd of Brigham City, Mrs. Rose Anderson of Salt Lake and Mrs. Lilly Fransen of Price Utah.

Mrs. Ross left Monday for her home in Salt Lake City.

Sgt. Bob McMullin, son of Mr. and Mrs. Wes McMullin, arrived home from overseas last week. Bob joined the airforce in June 1942 as a bandman and went overseas in Jan. 1945 as leader of a 15 piece airforce dance orchestra. After a months rehearsal, they entertained troops in Belgium, Holland and France for several months, then returning to England where they did radio broadcasts and entertained English troops. In Dec. they made a second tour of the continent this time including Germany. Bob arranged all the numbers played by the band. In his spare time he wrote several classical compositions and hopes to make writing and arranging classical music a full time job. Bob married an Edmonton girl and they have one small daughter.

Tory Forrington and family of Portland Ore. were visiting at the home of Fred Piegrass. Mrs. Forrington is the daughter of J.M. Piegrass, old time resident of Raymond.

Mr. and Mrs. P. B. Coppieters were visiting Mr. and Mrs. Chas G'ill at Millicent Alberta for a few days.

WORLD HAPPENINGS
BRIEFLY TOLD

A British firm now is manufacturing the first radar navigation set to be used by the merchant navy.

Polish authorities have re-started operations at what was once one of the largest paper mills in Europe.

The 7,500-ton Canadian Challenger, the first cargo ship to be built in the Quebec area since the end of the war, was launched recently.

A prices board statement attributed the shirt shortage to a world wide scarcity of fabric and the necessity of re-equipping Canadian factories.

The Moscow radio said that Soviet troops had completed the de-mining of all invaded Soviet territory, neutralizing 10,000,000 mines, shells and bombs.

Appointment of Russell K. Smith, a native of Regina, as assistant director of the pricing and distribution division of War Assets Corporation has been announced.

The population of Vienna, which reached a low point of 1,323,000 at the end of the war, has climbed back to 1,618,000, a census of the city's 26 districts disclosed.

Fishermen who come to Gosford, Australia, about 50 miles north of Sydney report a black market in fishing worms with prices as high as 35 cents for three worms.

Agriculture Minister Tom Williams said that 200,000 German prisoners-of-war would be used to help harvest Britain's crops this year and added that "substantial numbers of prisoners will again be available in 1947."

NYLON HOSIERY

Reconversion From War To Peacetime Production Has Not Been Completed

The tremendous demand for nylon hosiery cannot be met at present because reconversion from war to peacetime production has not been effected 100 per cent.

"It is not a simple matter for a hosiery mill to switch from the heavy rayon used during the past few years to the fine, gossamer nylon yarns women want," writes nylon authority, Katherine Mackenzie, in the current issue of C-I-L Oval.

"Complex adjustments have to be made to great banks of knitting machines so they can handle material half the size of rayon. Further, the strength and elastic properties of nylon yarn differ from rayon and consequently the construction of the stockings must be changed. All this takes time and involves much trial and error before perfection is obtained," explains Miss Mackenzie.

Describing the actual construction of nylon hosiery, she states each stocking has a gauge size stamped at the top. The gauge refers to the number of needles in each 1½ inches of the knitter's needle bar. The greater the number the finer and closer the texture of the hose. Set by the Wartime Prices and Trade Board, the price of nylons is determined by their gauge.

Nylon hosiery, she claims, will wear twice as long if properly cared for. When purchasing such stockings, women should usually order them one half size larger than the ordinary type. This is because nylons tend to retain their original shape and size when worn, while rayon and cotton stockings stretch.

When handling nylons care must be taken they are not snagged by rings or rough fingernails. They should be washed in mild soap suds, rolled in a towel to squeeze out the excess water, then hung up to dry by the toes or the hem of the uppers.

Miss Mackenzie spiked certain rumors about nylons often heard in feminine circles. She asserts that cigarette ashes, contrary to popular belief, have no effect on this type of hosiery. A live spark from a cigarette, however, will melt the yarn and result in a run.

"The myth that automobile exhaust fumes are harmful to nylons is also without foundation," she maintains. "You can wrap a nylon stocking around the end of the exhaust pipe and run the car for miles without the stockings suffering any damage other than smudging from the fumes."

Dresses, scarves and hosiery of nylon fabric are also being manufactured in limited quantities today, according to Miss Mackenzie. Like the stockings, nylon garments are easy to launder, she says. They should be washed in soap suds, thoroughly rinsed and rolled in a towel for partial drying before being hung up to dry. Although they can be ironed when damp, it was found that completely dry fabrics were easier to handle.

"Be careful that your iron isn't too hot or it will melt the fabric," cautions Miss Mackenzie. "If the iron has a heat control, the 'wool' setting should be just right."

THEIR LUCKY NUMBER

Mr. and Mrs. Charles Mills of Rochester, England, were married on Friday the 13th, celebrated their golden wedding on Feb. 13 and received 13 telegrams, 13 letters of congratulations and 13 callers.

FOURTEEN-YEAR-OLD BOY KILLED IN MYSTERY SHOOTING—When his chum was fatally wounded in the mystery shooting at a Chatham, Ont., swimming hole, and fell into the water from a tree, Herbert Morgan ignored the danger and dived in to pull him ashore. He points to the spot. One bullet bounced off the tree.

NATIONAL UNITY

There is no field in which the question of national unity is more important than in the field of health," writes Dr. Gordon Bates, in an editorial entitled "National Unity" in the current summer issue of Health, official magazine of the Health League of Canada. Dr. Bates is general director of the Health League and editor of the magazine.

"Canada is growing up. But Canada like all countries will only acquire full membership, assured status and finally leadership in the federation of the world by virtue of the physical and mental health of all Canadians."

"It is not sufficient that one or several sections of Canada should have low rates of sickness and poverty, that the citizens of only some areas should be well fed, well housed, healthy and long lived. It must be a matter of concern to all Canadians that some parts of Canada have lagged behind others. The great objective should be steadily advancing standards in all parts of the Dominion."

"This objective requires a continuous health education program for the whole of Canada conceived along the broadest lines involving the participation of as many units of all varieties as possible. Only by such means will official departments concerned with the health and welfare of the people be strengthened, only by such nation-wide effort will laws for the preservation of health and the abolition of poverty be passed in all provinces except only in some."

"A rotten apple will affect a barrel of good apples. Communicable disease will spread from a neglected area to a healthy area or the criminal in the slums may rob and kill his wealthy neighbor. The objectives of humanitarianism are not parochial but national and world-wide. And as the objectives of universal humanitarianism are realized there will be no slums or disease anywhere to infect the rest of the world."

"If we in Canada realize the significance of these ideals we will work not only for the health of parts of our country but always for the health and welfare of all Canadians."

Arctic Survey

Specific And Detailed Scientific Knowledge Is Required

TORONTO.—Speaking at the annual dinner of the Chemical Institute of Canada, Dr. A. L. Washburn, director of the Arctic Institute of North America, said specific and detailed scientific knowledge of the Arctic was badly needed for proper evaluation of its world role.

He elaborated with the statement "much has been learned by expeditions during the past 100 years, but many of the expeditions merely touched coastlines, leaving interiors still unknown. This is particularly true of the Canadian Arctic Islands."

He explained less than one half of Alaska has been topographically mapped, and less than one per cent. has been surveyed from the air. Parts of the Canadian Arctic have never been seen, much less mapped.

"Soviet Russia not only has weather stations but also general scientific laboratories where many types of research are carried on in addition to meteorology. There are almost no stations of this sort in Arctic North America."

William Conrad Roentgen discovered the X-ray on November 8, 1895. 2680

READY FOR TWENTY-FIFTH NORTHERN TRIP—Member of the Peary expedition which discovered the North Pole, Donald B. MacMillan, 71, is seen at the wheel of his schooner Bowdoin preparing for 25th voyage north.

TAKING ENGLISH COURSE

Swedish teachers will take an English language course at King's college, Newcastle, this summer. Arranged by the Swedish Institute and the British Council, the course will comprise conversation and lectures on British arts, political and social life.

Caligula, Roman emperor, held his horse, "Incitatus", in such high esteem that he gave banquets for it. Prominent Romans were required to attend and dine with the animal.

STILL THE FOUNDATION

According to a statement by an officer of a Canadian Life Insurance association: "Although radio, motion pictures and other media have an obvious appeal, the foundation of our public relations program has remained the press, and we feel that it will continue to do so."

CHINA LARGER THAN U.S.

China is about a third larger than continental United States. It is 1,860 miles from north to south and more than 2,000 miles east to west.

LIFE'S LIKE THAT

By Fred Neher

"My wife limits her calls to five minutes all right — but she calls me right back!"

REG'LAR FELLERS—Rather Flimsy

Max Was Memorized

Secrecy in Italy, On Italians

Secrecy so closely observed that an entire plan of attack was committed to memory by a handful of commanders and never entrusted to paper, was the way to the 1940 battle of Sidi Barrani which smashed Mussolini's dream of a Northern African empire, the war office disclosed recently.

Two months of planning went into the attack which, when it came at dawn, Dec. 9, 1940, cleared the Italians out of Egypt in one week, in an unbroken 500-mile advance, captured Tobruk, destroyed an entire Italian army of four corps and filled the "engines" with 130,000 prisoners.

"Effect of surprise" is how Gen. Sir Archibald Wavell, their commander-in-chief in the Middle East (now Field Marshal Viscount Wavell, viceroy of India), incidentally summarized the reasons for the success of the operation in a dispatch to the war secretary submitted five years ago, and now made public.

"In order to maintain secrecy, as few persons as possible were made aware of the plan, the commander-in-chief reported.

"Practically nothing whatever was put on paper, and not more than half a dozen senior commanders and staff officers knew of the plan until shortly before its execution.

Lord Wavell gave two other contributing factors: "Good co-operation between the three services, army, navy, air force, and 'fine' leadership and fighting qualities displayed by all personnel."

Planning was so secret that a preliminary exercise for the attack was explained to the troops involved as purely a training exercise, and the only warning they had of the assault to come was an indication that "a further exercise" would be held at a date early in December."

Executed As Spy

Man Who Lost His Life In Japan For Assisting British Forces

VANCOUVER.—The British passenger freighter the Empire Gunfleet, docked here recently from Hong Kong, bringing with it the personal effects of T. C. (Mysterious) Monahan, executed by the Japanese for assisting British intelligence officers during the war.

Monahan was a Canadian Pacific Railway agent in Hong Kong when the city fell. It was there he received the nickname "Mysterious."

He escaped internment by conquering Japanese armies by establishing his citizenship as a member of the Irish Free State. He received comparative freedom of the city, and organized a food smuggling system into internment camps. At the risk of his life, he assisted British intelligence forces by informing them of Japanese movements.

Monahan escaped detection only for a short time. Then a leak occurred in his system and he was captured and executed as a spy.

His personal effects were forwarded to his widow in New York.

Both Chinn and India are credited with the origin of puppet shows.

Construction Boss

The Dog That Took A Deep Interest In The Building Of A Bridge

In building a bridge across the creek that bounds the farm, the Province undoubtedly intends to facilitate traffic; that and nothing else. But the retriever which lives down the road has a wholly different conception of the project. It seems to him specifically designed to furnish him the company of a number of agreeable men who do interesting things.

When the construction crew arrives in the morning, there is the retriever and he inspects all phases of the project. But it is when something falls into the water that he really goes into action. It may be a stick but he salvages it. He has been seen to handle a large plank that would tax the strength of a good sized boy. These things he pushes to the bank and then tugs them out of the water several feet onto dry land.

In the early stages of the job the dog was sometimes interrupted by his master who would come for him. Now the owner is occupied with getting his hay crop into the barn, and his busy interference has ceased. So the dog can see each day's work through to a finish.

Although all this activity is right under the nose of our setter, he and the retriever seem to have some understanding, that it is the retriever's domain. The setter does not go there unless accompanied by some human. On the other hand, the retriever can use the near bank of the creek only in his salvage operations. If he strays beyond that into the yard, the setter goes to the scene with an air of great dignity and the retriever goes back within his own boundaries. There has been no fight about the matter, but that there is an understanding is quite evident.

It will be a prosaic world for the retriever when this bridge job is finished; that is it will until the duck season opens.

Wiltshire Mansion

A Rambling Old House With Many Windows

In the Wiltshire mansion of Longleat, a rambling house with as many windows as there are days in the year, there died Thomas Henry Thynne, fifth Marquis of Bath.

For 50 of his 83 years, the marquis was lord of Longleat, which his ancestor Sir Thomas Thynne (pronounced Thin) inherited in the 17th century.

To him came the modest honors of the squire — chairmanship of the county council, the Lord Lieutenant of Somerset.

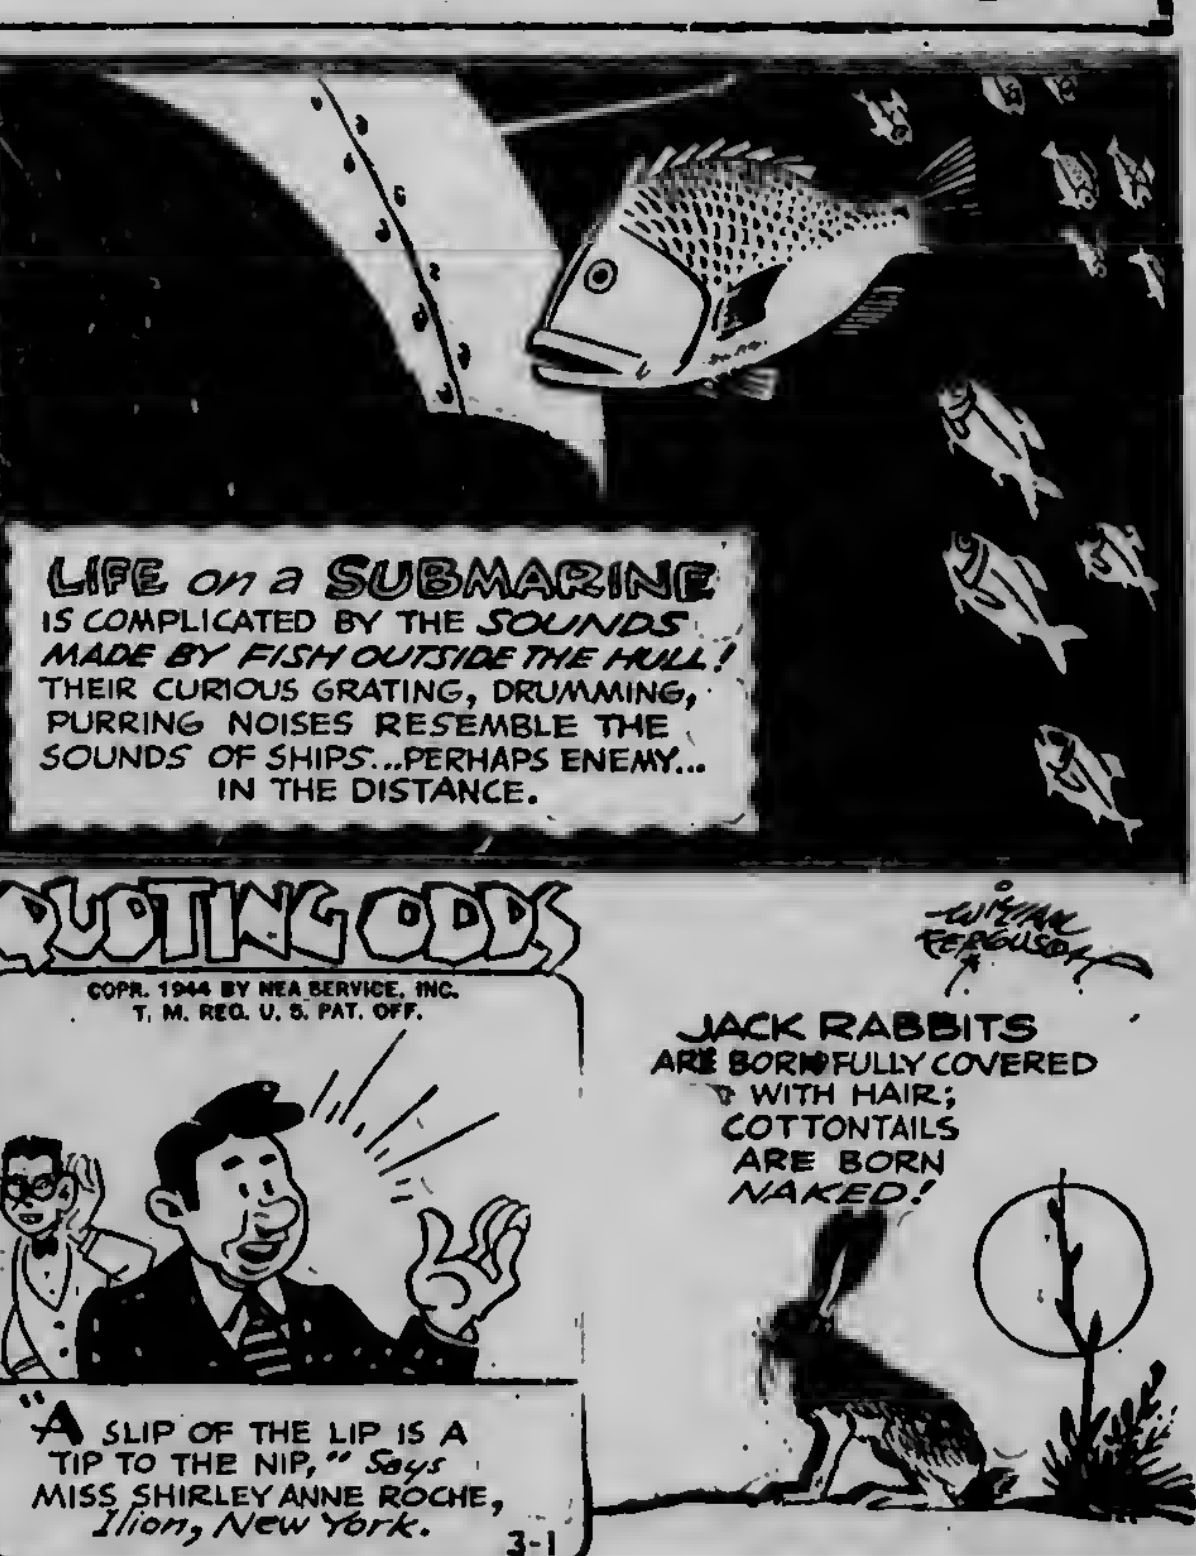

He served for two spells in Parliament as Conservative M.P. But, with the Liberal Government of Campbell-Bannerman in power, the marquis retired to Longleat.

There, on his 70th birthday, he lit a huge bonfire, which the folk of four counties could see.

There was free beer at the village inn, country dancing on Longleat's lawns. It was as if the years had not been, and Queen Bess was on the throne, as she was when Longleat was built.—London Express.

OUR COMPLETE SHORT STORY—

CRAZY FOR MONEY

By ERNEST MILES

Copyright
Wheeler Newspaper Syndicate

BACK for the "Crazy For Money" program, Bud Watson was on the platform waiting to go on the air. If you listened to the show two weeks ago you will remember Mart Ringley, the Master of Ceremonies, introduced Bud. He told how Bud had just been discharged from the Army and had volunteered for any stunt asked of him. But was to go out to Roscoe's Mammoth Carnival in the Fair Grounds, and to act as a singer for Captain Billy's Bathing Beauties.

Captain Billy Swanson was there to take him out and as a prize Mart gave Bud half of a \$100 bill, telling him to return in two weeks and relate his experiences, promising him the other half of the bill if he made good.

And now the program was on the air and Mart Ringley was saying, "Hello! Hello! Hello! Tonight we are going to hear what happened to Bud Watson, who two weeks ago went out to the Carnival to be a singer on Captain Billy's Bathing Beauties show. Captain Billy is here, too, and I see he has brought a very pretty blonde with him. We'll start with you, Captain. But first, who is this lovely girl?"

"Oh, this is my daughter, Dora, who got herself involved in the stunt so I brought her along, too."

"This sounds mysterious, but tell us first what you did with Bud."

"Well, I told Bud to stand by the ticket booth and watch me do a couple of ballyhoos. That's how my daughter, got mixed up in it, for Dora was selling tickets and Bud paid a whole lot more attention to her than to me."

"There was a big crowd of folks who had heard your broadcast and had come out to hear the fun. They began calling for Bud so I brought him onto the platform. That big, red-headed six-footer just stood there tongue-tied. However, I managed to get him going and he did pretty well so I sent him inside to announce the events. The crowd swarmed in after him. We did a whole of a business and Bud got better all the time."

"Then you would say Bud was a success and deserves the money?"

"He did all right but he was still paying more attention to my daughter than to the show. It ended up by my having him thrown into the tank of water."

The audience was screaming as Mart asked, "You mean to say the evening ended with Bud in the water?"

"Oh, not that night, it was three nights later that happened."

"What in the world has three nights later got to do with it? We'd better get Bud to straighten this out. Bud, tell us what happened."

Bud stammered a bit, "Well, as the Captain told you, we went out to the show and I was to listen and learn from him what to do. But that girl in the ticket booth set my head in a swirl and I just couldn't concentrate on what the Captain was saying. She was very cool with me and told me to run along and attend to my own business. Then Captain Billy called me onto the platform and there I was in front of that crowd, standing with six girls wrapped in dressing gowns. Gee, I couldn't say a word."

"The crowd laughed at me and Captain Billy said, 'get going, kid,'

so I did the best I could."

"But," asked Mart, "how in the world did you get thrown into the tank three nights later?"

"Oh, I was crazy about the girl in the booth and went back each night determined to make her like me, I hung around but she wouldn't talk. Captain Billy got madder and madder and tried to chase me away. On the third night he had a couple of fellows throw me into the tank."

"Keep going, Bud," said Mart, while the crowd roared, "you really got yourself all wet, didn't you?"

"I was certainly wet and just as I got out of the tank Dora came back with the cash and tickets. When she saw what had happened she let out a yell and chased those fellows out. Then she turned and gave Captain Billy a tongue-lashing. I didn't know until then she was his daughter."

"She seems to have begun to take an interest in you at last. What did she do then?"

"Dora sent me back into one of the dressing rooms to dry out."

"Now you're dry again," said Mart, as the audience applauded, "or is that the end of the story?"

"Oh, there's lots more of it because the Captain was still hostile, but I got along fine with Dora and I kept going every night. She told me she had liked me right from the start but thought maybe I was just another flit."

"Ha, ha, romance seems to have bloomed," said Mart and "let's hear what Captain Billy has to say."

"I didn't like it at first because Dora is only 18 and I've been both father and mother to her. Her mother died when she was three. But Bud is a persistent guy. I could see Dora had fallen hard for him. Bud was just out of the army and had no idea as to what he was going to do. I couldn't figure my future on that basis, but Dora straightened it out."

"She got him a job so he'd be able to marry her?"

"She certainly did. Bud is now my chief assistant and doing a swell job. When the season is finished they plan to get married and I'll still have my daughter plus a darn fine son."

By now the audience was standing, cheering. Mart finally broke in: "It just goes to show you never know what will happen on this show. Bud, here is the other half of that \$100 bill. Good luck to both of you."

"Thank you very much, it has been a wonderful experience," said Bud and passed the bill over to Dora.

"There," said Mart, "it's the woman who wins. Tell us, Dora, what are you going to do with that money?"

"Well, Mr. Ringley, Bud promised it to me towards the finest trousseau a girl ever had, but Bud is the best prize of all, a real Valentine, and we're going to be very happy."

"I'm sure you will be," said Mart, "and Bud may have been crazy for money but he certainly is wise in his choice of a wife."

Farm Research

Agricultural Groups See The Need For Further Information

An increased demand for the services of agricultural economists was forecast by Dr. J. F. Booth, head of the Dominion Agricultural Department's Economics Division in an address to the 17th annual meeting of the Canadian Agricultural Economics Society at Macdonald College, Ste. Anne de Bellevue.

The Economics Division must provide information useful to farmers, those marketing agricultural products and governments dealing with the farmers' industry, Dr. Booth said.

Since establishment of the division in 1929, much of the initial work had been to build up factual information on problems faced by the individual farmer. During the war, much of the research had been curtailed, but the division had helped in developing and administering numerous farm policies.

Practically every type of activity carried on before the war was represented in requests made to the division by agricultural groups throughout the country for additional research work.

The Chinese used rockets in 1232 to repulse the herds of Kublai Khan.

GIRL SWIMS 13 MILES—Swimming 13 miles in seven hours, Patricia Smith, 19, is recovering in hospital at Sturgeon Bay, Wis., sole survivor of a tragedy on Lake Michigan. Her father, a wealthy shipbuilder, and three guests on their 33-foot sloop drowned when the vessel capsized in a sudden squall.

Mary Lomis of Chicago was one of the guests who drowned when the Smith sailboat overturned. Miss Smith said she loved Mary, who had a lifebelt, for several hours "until I just couldn't hang on any more. I lost my grip and she vanished in the waves." The lone survivor thinks the vessel was caught in the fringe of a tornado.

Conserve Timber

The Great Loss From Fires Has Been Stressed

The current slogans urging Canadian manufacturers to export should carry a warning that export is conditional upon conservation of natural resources, Garfield Weston, well-known industrialist said in a message to the Canadian Forestry Association.

"More than \$300,000,000 of annual exports from Canada derive from the pulp and paper mills. This is greater than our sales of gold or wheat. The pulp and paper industry stands first in total wages paid and in capital invested."

"About 6,000 of our people find means to incinerate 400,000,000 cubic feet of the national wood supply every 12-months. Export stops on lands that fire passes over. And a gap of 50 to 100 years may ensue before the burned district comes to life again."

THANKS CANADA

Viscountess Alexander Grateful For Help Given During The War

Large supplies of oranges and milk, large newspapers and envelopes which were used only once are details of Canadian life which impress anyone arriving from Britain, Viscountess Alexander said.

Speaking to the Ottawa Women's Canadian Club, the Governor-General's wife told her hearers of her children's excitement at the thought of coming to Canada and their delight with the trip.

"They have made themselves completely at home, so much so they have needed some firm handling," she said.

"It was my husband's and my idea that we should keep our children out of school until next September, until they became accustomed to their new home. But I wasn't here 10 days when I knew ours was not a wise decision, and in a few more days I sent them off to school."

Lady Alexander thanked the women of Canada for their help to Britain during the war. The Red Cross had helped to finance 100 war nurseries, the Junior Red Cross had sent comforts, the Imperial Order, Daughters of the Empire had sent clothing, the Kinsmen Club milk, and the Queen's Canadian Fund kitchen utensils and household goods.

SELECTED

RECIPES

BAKING HINTS

Before starting to mix a cake, read the recipe carefully, be sure that all the ingredients are at hand, and that the process of putting them together is thoroughly understood.

Use only the best materials. Good quality shortening (butter gives a better flavor) and using a pure high strength baking powder that assures baking success.

Use fine or castor sugar, coarse sugar does not blend well with other ingredients. If the supply of sugar is limited, a good plan is to sift it, and use the coarse particles for general sweetening fruit, pies, etc.

Measure all ingredients carefully, use the correct method of mixing, and bake as directed. Grease tins with lard, not butter. Pre-heat your oven using top and bottom heat, but when your cake is put in to cook turn off the top element for baking. Cakes put in the oven at too low a temperature, cause excessive steaming and makes them heavy.

BUTTER BUNS
2 1/2 cups pastry flour
1 cup brown sugar
2 teaspoons Melrose vanilla
1 cup butter or shortening
2 well beaten eggs
1/2 teaspoon salt
1 teaspoon cream baking powder
Method—Cream butter, add sugar gradually, then the well beaten eggs. Sift 2 cups of flour with baking powder and salt, combine the mixtures, and add remaining 1/2 cup of flour if necessary. Roll into small balls marking each one with a floured fork. Bake in a 350 to 375 oven for from 10 to 12 minutes. This makes 12 dozen butter buns and are delicious.

POSITION WANTED

The sergeant was trying to train an awkward squad of recruits.

"Shun! About turn!" he roared. Then, as he viewed the hopeless mix-up, he went on: "As you were!"

Most of the men shuffled into the last position, but Private Jones stood still, looking vacantly ahead.

"You!" snapped the sergeant. "I said 'As you were!'"

"I 'eard, sarge," replied Jones, unhappily, "but 'ow were I?"

Louis XIV had 413 beds. Some were decorated with pearls, silver and gold.

Outstandingly Good

"SALADA" TEA

"Yes, yes, of course I'm glad to see you—who's your cute friend with the crisp, crunchy, delicious Grape-Nuts Flakes?"

"Ha Ha!—I fooled you Jim! That's our new cook. She won't serve anything but malty-rich, sweet-as-a-nut Post's Grape-Nuts Flakes for breakfast."

"Well what are we waiting for? Let's get home quick and dig into that giant economy package."

SMILE AWHILE

"Now, mada, can you pick out the man who stole your hat?"

"Oh, I think so, Inspector—do I have three guesses?"

"Aspiring Vocalist: 'Professor, do you think I will ever be able to do anything with my voice?'"

"Pursuing Teacher: 'Well, it might come in handy in case of a fire or shipwreck.'"

"Pa," said the subscriber's little daughter, "I know why editors call themselves 'we.'"

"So the fellow who doesn't like what's printed will think that there are too many for him to lick."

Customer: "Can I exchange this unbreakable doll?"

Shop Assistant: "Is there something wrong with it?"

Customer: "No, only the lady's broken every breakable thing in the house with it."

"You told me you hadn't any mosquitoes," said the summer boarder, reproachfully.

"I haven't," said Farmer Home-spun. "Them you see flyin' around come from St. Perkins's place. They ain't mine."

Jimmy told his mother he was going to be a preacher when he grew up. Upon being asked why, he replied:

"I'll have to go to church anyway, and it's much easier to stand up and yell than to sit still and listen."

"I say," he complained, "it's not necessary to knock me down like that, is it?"

"Bless ye, no!" replied his teacher genially. "Up 'e jump an I'll show 'e thirteen other ways of doing it."

Foreman (to small son of workman who has met with an accident): "When will your dad be ready to work again?"

Boy: "Can't say for certain, but it will be a long time."

Foreman: "What makes you think that?"

Boy: "Compensation's set in."

Waiter: "What's wrong with those eggs, sir? Weren't they cooked long enough?"

Customer: "Yes, but not soon enough."

Patient: "I can't say why, but I get a sort of a pain, I don't know where. And it leaves me in kind of—sort of—well, I don't know."

Doctor: "Here's a prescription for I don't know what. Take it I don't know how many times a day for I can't tell how long, and you'll be better I don't know when."

Far-Reaching Effect

Lack Of Baling Wire Means Less Feed For Livestock

The Wall Street Journal reports that manufacturers in the United States have been cutting down seriously on the production of baling wire. The price ceilings have made it unprofitable for the steel mills. Lack of baling wire means lack of hay; lack of hay means less feed for livestock, and that in turn means thinner meat animals for slaughter.

It all goes to show what a complex organism modern society has become. And it reveals the same old story, for want of a nail, the shoe was lost, for want of a shoe the horse was lost, and for want of a horse a rider was lost.

No farmer can bale his hay with shoe string!

Street Renamed

Greeks Show Their Appreciation For Assistance From Canada

Lycabettus street, prominent thoroughfare in Athens, was renamed Mackenzie King street in a ceremony July 1, 79th anniversary of the confederation of Canada.

The municipal council of Athens said the street was renamed "in recognition of the gratitude of the Greek people to the Canadian Prime Minister and the Canadian people for the moral and material assistance which has been repeatedly extended to this country."

UP IN SMOKE ?

There is a need for some incinerators along the back of the business blocks in the town. If three or four businesses adjoining each other would go together and build a good incinerator for their own use it would add greatly to the appearance of the rear of the business section. Every thing burnable could be disposed of. It would cut down the fly hazard. And the city would be discouraged. With the advent of the sewer this year, there will be no need for the mess caused by garbage and dish-water disposal along the back of cafes etc. With several good incinerators along the rear of these buildings the back can be maintained as well as the front. Too the fire hazard from burning trash would be kept down if proper incinerators were installed. The cost of such disposal units would not be too great if there were two or three businesses together on one incinerator.

SEWER PIPE

CONTRACT LET

Alberta Clay Products of Medicine Hat have been awarded the contract to supply the pipe for the new sewer. Word has been received by the Town that the first carload of pipe is being loaded ready for shipment this week. In talking with the Mayor he expressed his opinion that the sewer would be completed by fall, providing no trouble was encountered. At any rate the sewer will be well on its way to completion by freeze-up.

Work on the sidewalks started this week and it is to be hoped that they will be completed soon.

It's a Good Idea!

MAKE IT COME TRUE!

Stores on countless Alberta main-streets are planning future improvements. Treasury Branch services help these plans to come true. Who Dood It

Some kind soul with an overdose of ambition hooked onto the stop sign at the corner of the Broadway store and pulled it away. The same person, it asked to dig it up and move it and had been offered pay for the job would in all probability refused it. Human nature is funny. The person never realized that the cost of putting the sign up in the first place came out of his pocket as a taxpayer and that the cost of putting it back would come from the same source.

There is another hole that needs fixing sometime before the first of September when the schools open again. Its in the alley between the Theatre and the Pool Hall. To be sure there are board over the top but they are just resting there. It could cause a serious accident as it is right in the middle of the alley where the traffic is. Perhaps the Town could be persuaded to send someone to look after it and have the cover properly nailed down.

The fire in mens hearts needs to be a fire that both warms and burns.

The world moves ahead, not through men who push themselves forward, but through those who pour themselves out.

Maintenance of Soil Fertility

Recently, a world-wide survey has been made to determine the degree to which soil fertility is maintained or lost under various systems of agriculture. This survey has shown that, in general, reliance is placed on three different methods to maintain soil fertility. Briefly, these are as follows:

METHOD 1. Natural recuperation of the soil without manuring. This method is employed in the modern extensive agriculture of Australia, Argentina, Western Canada, and in wheat areas of the United States. It seems that a wheat yield of around 13 bu. per acre represents the level at which soil fertility is maintained by this method.

METHOD 2. The use of local manures, chiefly animal, to supplement natural recuperation. This method is best seen in the traditional agriculture of China and Japan. About 20 bu. of wheat per acre represents the level of fertility reached by Method 2.

METHOD 3. The use of inorganic (mineral) fertilizers to supplement local manures and natural recuperation of the soil. This method is employed in the intensive farming systems of Great Britain, New Zealand, and, for some crops, in the United States. The average yield of wheat in countries where this method predominates is around 35 bu. per acre.

From this survey it is clear that the first method maintains soil fertility at the lowest level. The method is, in effect, one of "mining" the initial fertility of the soil. Unfortunately, it is the method that is widely employed in Western Canada. Already, it has led to soil exhaustion and to severe soil erosion.

If we are to secure and maintain the increased crop production the world so vitally needs, it is imperative that we increase the use of mineral fertilizers. We must stop burning stubble and straw, and wasting farmyard manure.

"MY WEEK"
by R. J. Deachman

What do we mean when we say: "He was a man of fine character"? What are the qualities which enter into "character"?

This question was put up by one of the members of the "Mourners Club" as we sat at lunch a few days ago. We had been running over a wide range of topics, one thing after the other, when suddenly one of our character members spoke up and asked the question. There was a wide variety of answers. One man said, "honesty and integrity"; another said "honesty and kindness"; a third gave his definition in one word—"unselfishness". I think he had something there. Unselfishness in the individual, the group, the nation, would make a new world, in fact a better one.

Who can give the best answer to that question in not more than twenty words? Let me hear you. If there is somebody out there in the wide area for which I write who has a sparkling idea let it be brought into the light. Drop me a line, I'll read it to the "Mourners Club".

It's a nice thing to have people do your work. I was sitting in a hotel room not long ago reading a morning paper, which I did not like, when the maid opened the door and seeing me started to go out again. "Come in here," I said, "you won't disturb me." Casually I watched her at work, some times I have made a bed myself, it is no the easiest thing in the world to make them smooth and neat, everything in line. Finally I said to her "That's a marvelous corner, its very neat." "Yes," she answered "that's quite new, its called a tailored corner, some of the girls cant do it." When she was through it was a perfectly made bed. "You have pride in your work," I said, "Yes," she answered "I like to see a job well done." "There is a bit of poetry about that," I replied, written by a chap named "Longfellow" its called, "The Builders":
"In the elder days of art
Builders wrought with greatest care
Each minute and unseen part
For the Gods see everywhere."
I gave her a quarter. "Thats a nice piece," she said, "For the gods see everywhere", thank you. I lost my

place in the editorial I was reading, it didn't matter anyway. Then suddenly it struck me, she thanked me for the last line of the poem not for the quarter. She was glad to know that the "gods see everywhere". I was glad I told her about them.

Spies are a great feature of Russian life. They find expression in art, literature and the stage. John Scott, an American, who went to Russia, married a Russian girl and lived in Russia for many years, tells us this story in his book, "Behind the Irons." He went with his chum one night to a spy play at the theatre in Magnitogorsk. It was the usual play of that type—a foreign spy, a Russian investigation, the long trail. Then the spy is caught, the case is proved against him. He is a bold boy, however, and huris defiance at his accusers:

"The decisive battle is ahead of us. I will be shot but you will go down in defeat. Your hateful people will be driven from your broad lands to make room for a more competent and more cultured race of men."

"The investigator hurried back the challenge. 'We will be the victors,' he shouted, and the entire cast stood in

solidarity behind him.

I quote now from John Scotts book "The curtain fell amid wild applause and even wilder scrambling to be out and first in line at the coatroom."

"The workers of Magnitogorsk were greatly impressed by the play, as indeed were Joe Barnes and I. It demonstrated the necessity for the entire population to cooperate with the authorities in apprehending foreign spies. On the other hand, it failed to point out the danger and tragedy involved in over-enthusiastic purging."

"They may catch some spies now, but it will take a generation to live down the fear and suspicion being created," Joe said as we left the theatre."

The last paragraph tells the story. In the Anglo-Saxon world we never think of spies unless they are thrust upon us. Russia has lived so long with spies and fear of spies that it may take several generations to eliminate them from the mind of the people. A nation trained in hate and fear misses the joy of life. What a tragedy. Who owns America? Do you think of it as a great land with a few bloated plutocrats controlling the affairs of the nation? In a check on 72 large corporations, with an aggregate of

WEEKLY LETTER
The Windbreak

Every farm home can and should be protected by a wind break of trees and shrubs. A good windbreak can be secured if sufficient attention is given to its planning. A moment's thought will suggest that no hard and fast rules can be laid down for the exact position of the windbreak. It should be planned to give protection to the farmhouse and other buildings from the west, northwest and north winds. However, in no case should it completely surround the farmstead thus cutting off views of the outside world. Also the windbreaks should be located so as to leave enough space within it for additional buildings. In general, roads and buildings should be at least 30 yards from windbreaks to avoid snow drifts. The question has often been asked what area can be protected by a windbreak. The late Dr. Saunders found a shelter belt 10 feet high protected an area 500 ft. wide.

A four row windbreak consisting of a row of caragana, a row of Russian or North-western poplars and two rows of white spruce make a very commendable type of windbreak. The caraganas should constitute the outside or windward row spaced twelve to twenty four inches apart in the row. This is followed by the row of poplars placed six to eight feet from the caraganas and they should be planted eight to ten feet apart. The first row of white spruce should follow ten feet from the poplars, the second row of white spruce four to six feet from the first. The spruce are planted four feet apart in the rows thus completing the windbreak. All trees should be staggered, that is never planted opposite each other. This arrangement is made with the

realization that eventually the white spruce will constitute the real windbreak, for the poplars have a short life of only about twenty five years in many localities.

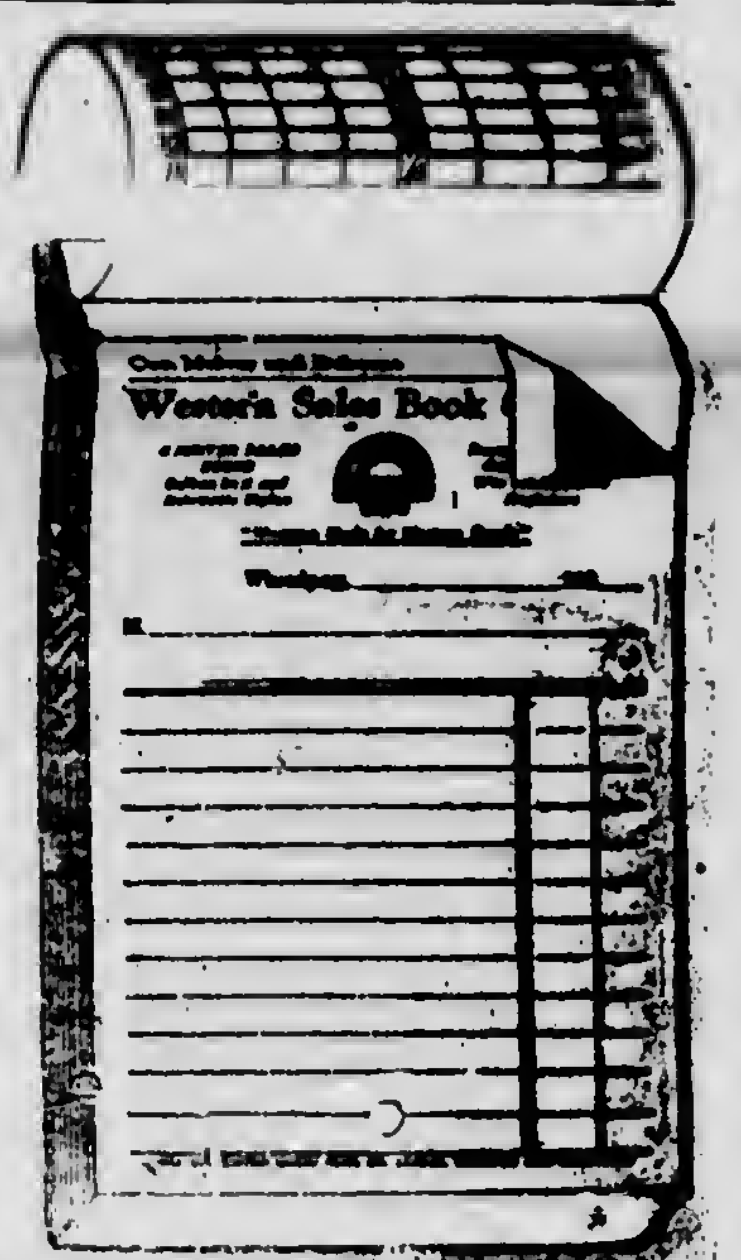

There are advocates of planting the trees in the windbreak four or five feet apart but such close planting prevents very essential cultivation. In close plantations the closely knit boughs keep out the light and lower limbs die, converting the windbreak into an ugly grass-ridden thick et, filled with dead limbs.

A windbreak of four rows requires a strip of land twenty to twenty four feet wide. This land should be ploughed and disced as soon as spring work will permit, the season before planting. The cultivated strip must be kept clean that season, for there is nothing that will act to the detriment of the trees in the windbreak like a solid sod-mat or a rank growth of weeds.

The quickest and best way to plow is to strike out a furrow for the row of trees. The best depth to plant is one inch deeper than the plants had previously been planted. If the furrow is not deep enough use a shovel to deepen the hole required for the larger plants, and a dibble or crow bar for seedlings or cuttings. The planters should follow the plough closely so as to plant in still moist soil, taking care that the roots of the seedlings are not exposed to the air long enough to become dry. The soil should be packed firmly about the roots. A tree properly planted is a tree not easily pulled out.

2,925,449 employees, it was found recently that they had 4,082,806 stockholders. The stockholders substantially outnumbered the employees. Total sales of these corporations in 1945, plus receipts from other operations, amounted to \$33,560,000,000 Net income after taxes was \$1,550,000,000, an average of 4.6 cents per dollar of sales. Dividends paid including both preferred and common stock, totalled 988,000,000 or 3 cents per dollar of sales. The margin of profit is not large. The average man still owns America.

Farms and cottages of the centuries old hamlet of Charlton, near Bristol, England, will be torn down in order to build a second runway for the 110 ton Brabazon I airliner — biggest land plane yet made in Britain — now under construction. Villagers will trek two miles down the road to the new homes that the British Govt. is to provide for them. Besides the runway, a huge hangar is being built on a nearby golf course, at a cost of \$7,000,000.

The New Ration Books

IT WAS ANNOUNCED recently that in September, the sixth ration book will be distributed in Canada. There was a time when it appeared that ration book number five would be the last one to be issued, and that by the time the coupons in it had been exhausted, conditions would be such that rationing would no longer be necessary. On the contrary the world food situation is now more serious than it was at any time during the war, and the necessity for the continuation of rationing here is apparent to everyone. We also know that under our present system we are infinitely better off than the people of Britain, Europe and the Orient; and in many Canadian homes today there is voluntary rationing of foods which can be shipped abroad.

Should Be Ready To Co-operate

In announcing the decision to issue new ration books, Mr. Donald Gordon, chairman of the Wartime Prices and Trade Board, said: "Continued rationing in Canada is this country's answer to a world crying for help. As long as human beings in so many countries of the world are starving or near starvation, it is unthinkable that Canadians should refuse to do their share in helping out." There will be few who disagree with Mr. Gordon in this respect. As yet, Canada has been untouched by any real food shortage, such as has been experienced in other countries. There are many who believe that, before the current world food crisis is over, this continent will be more seriously affected than it has yet been. Whatever the situation may be in the future, there is no doubt but that we are at present fortunate in comparison with the people in other parts of the world, and we should be more than willing to co-operate readily in whatever measure of rationing the authorities consider to be necessary.

Many Volunteer Workers Needed

Distribution of the new ration books will commence on September 9th, and will be issued through the six hundred local ration boards situated across Canada. As in the past, thousands of volunteer workers will be needed to assist in the task of distribution, and an appeal has been issued to all those who are in a position to help, to offer their services as early as possible. Consumers have been asked to keep in mind that much of the responsibility for receiving the new books lies with them, since the books must be called for at the local distributing centre. It has also been pointed out that while books are to be issued throughout the week of September 9th, all local distribution points will not be open continuously during that time, and it is the responsibility of the consumer to find out at what times the centre in his locality is to be open. For their own convenience, and in the interest of saving the local ration boards time and trouble, citizens should make every effort to co-operate fully in securing their new ration books promptly.

Life Savings

Not So Easy Now To Live On The Low Interest Rates

Until a few years ago scores of thousands of Canadians could contemplate secure retirement on life savings of \$10,000 to \$20,000. A farmer could sell his farm, or a small merchant his store, invest the proceeds at 6% and this income plus that from what he had already saved would allow him to live in comfort the rest of his days. He can't do that now and with interest rates still declining he will be in greater difficulties tomorrow. Twenty thousand dollars invested in good securities gave a man an income of about \$100 per month before the war. To get the same income now requires an investment of \$40,000. In the meantime those planning retirement face a double squeeze. The tremendous increase in income tax makes it more difficult to accumulate savings and the sharp rise in the cost of living makes a greater income from those savings necessary. — Financial Post (Toronto).

NO DUST NO RAIN

There would be no rain in the world were it not for dust particles, which provide surfaces on which the tiny particles of moisture condense to form drops of rain.

Many German Prisoners Of War Object To Going Home

More German prisoners of war are at large in Canada and are being hunted now than at any time since they were interned in the Dominion. It has been reported, and this is likely due to the fact that many of them want to avoid being returned to Germany. One escaped man who travelled to this country from a U.S. prisoner of war camp and was picked up recently made the frank confession that he could not bear the thought of being sent back to the Reich. He told police that, even in internment in a war prisoners' camp was preferable to returning to Germany. But regardless of what sentiments German prisoners express and how they "yearn" to stay in this country, they should not be allowed to remain here. All efforts ought to be put forth to round up those at large, and every prisoner of war should be shipped back. If they still feel a keen desire to come back to Canada, and to become good citizens of this country, they will get their chance eventually through the regular immigration channels, if and when immigrants from Germany once more are accepted. But in every case where Germans are let into Canada in future, they should be thoroughly screened to make sure they are not potential troublemakers. — Niagara Falls Review.

Governor For Malta

The Newly Appointed Governor Was Born In Canada

Mr. Francis Campbell Ross Douglas, M.P., the newly-appointed Governor and Commander-in-Chief of Malta in succession to Lieut.-General Sir Edmund C. A. Schreiber, K.C.B., D.S.O., was born in Canada in 1889 and was educated at Glasgow University. He has been a member of parliament for North Battersea since 1940. He served as Parliamentary Private Secretary to the Ministry of Education from 1940 to 1945 and has since been serving as Parliamentary Private Secretary to the Home Secretary. He has served as a member of the Railway Assessment Authority, the Anglo-Scottish Railway Assessment Authority and the Public Works Loan Board and also as chairman of the Finance Committee of the London County Council. He is chairman of the House of Commons Select Committee on the Estimates. The acceptance of this post will entail Mr. Douglas' resignation of his seat in the House of Commons.

The Chinese were using coal and gas for heating purposes in the sixth century.

Price Control And Rationing Information

Q.—What happens to the meat coupons and tokens which are turned in to the Local Ration Boards and voluntary collecting organizations for the supplying of meat to starving people overseas?

A.—All meat tokens and coupons are turned in to the Local Ration Boards by the voluntary organizations and these are counted at regular intervals. The Meat Board then knows exactly how much extra meat will be available for export. Through the coupon collection system, up to the end of May Canadians made 325,000 additional pounds of canned meat available for shipment to the hungry.

Q.—Instead of turning in meat coupons and tokens which will not be needed for a family's own use, would it not be just as well to destroy these coupons at home rather than send them to the Local Ration Board or to some voluntary collecting organization?

A.—If you destroyed these tokens and coupons in your own home, the Meat Board would have no way of checking on how much meat was being used by you. For every valid meat coupon and token you turn in the authorities know definitely that that much less meat will be needed to meet the ration.

Q.—How many canning sugar coupons are allowed us this year?

A.—Ten coupons have been validated for the purchase of canning sugar, each coupon being good for one pound of sugar. On May 2 the first five coupons were declared valid and on July 4 the remaining five were validated. The coupons used for the purchase of this sugar are the sugar preserves, and if canning sugar is not required, the coupons may be used for the purchase of preserves.

Please send your questions or your request for the pamphlet "Consumers' News" or the Blue Book in which you keep track of your ceiling prices, mentioning the name of this paper to the nearest Wartime Prices and Trade Board office in your province.

HAD NO INFORMATION

H. G. Wells attributed the decline and fall of the Roman Empire to the lack of newspapers since there was no method of exchanging information between Rome and outlying regions.

BEST JOB IN WORLD

Farmers Overcame Great Odds And Tipped Scales Of Victory

The Canadian Federation of Agriculture agreed with the proposal of the Canadian Weekly Newspaper Association to join with them in a nation-wide "Salute to Agriculture".

The weekly newspaper is, perhaps, closer to the land than any person or collection of persons outside the profession of farming itself. Farm people are our neighbors, and as we have mentioned many times during the war years, we are proud of our neighbors, and their great war record.

Only the armed services gave more than our farmers; few, very few, others gave as much. They overcame great odds and great handicaps, in lack of help, in worn and entirely inadequate machinery, and the weariness that years bring on men and on women. But in the face of all this they actually increased food production by over 40 per cent, and by so doing they tipped the scales of victory.

But having won the battle, are we going to win the peace? No peace will ever survive in a hungry world. And the world is hungry today. In fact the forecast from Great Britain is that three times as many people will die of starvation in the next six months as were killed in the whole of the war, and the number of potential famine victims at the end of six months is estimated at 60,000,000 dead.

This is the picture that faces our farm producers. Will they live up to it and surmount it? Undoubtedly they will, just the same as they did during the long six years of war. No one outside of the farmers themselves will ever know how hard a task it will be, but sometimes we wonder if they are not just a little pessimistic about their work and their profession. In one breath they deplore the terrible hardships of the farm, and the next day deplore the leaving of their sons and daughters from the farms to the cities.

Such pessimism will never improve agricultural conditions. In fact, until farmers come to realize this, there never will be an improvement. Every farmer should read and memorize the words of the Canadian Minister of Agriculture, spoken in the House of Commons: "If we want to keep our boys on the farms, we shall have to preach a different kind of philosophy from what is being preached today in this House and elsewhere. We must preach the philosophy that there is nothing better, or more worthwhile, than producing food and clothing, the two things that are necessary to all of us. If farming, producing the things we need the most, is not considered the best of all the professions or trades, or whatever you like to call it, there is something wrong with our way of thinking."

We believe that farming is the best profession, or trade, or whatever you like to call it, in all the world. And that it is getting better all the time. That is why we join in a salute to agriculture, not only for its war effort and victory, but for the effort it will, without a question of doubt, put forth to win the peace.

CARRIES SOUND

The sound of the propeller of one ship can be heard by listening near the hull in another ship's cabin below the water line, exemplifying the transmission of sound through the sea.

Motorists should check their headlights once a month to be sure they are in line.

Canada Is Second Country In The World To Have Uranium Pile

Canada is the second country in the world to have a moderator-stabilized uranium pile, Dr. L. G. Cook of the Atomic Energy Division, National Research Foundation, revealed in a pamphlet being published for the annual conference of the Chemical Institute of Canada.

The pamphlet discloses for the first time some of the facts of Canadian atomic research and predicts Canadian scientists will be among the first to experiment with radioactive elements, to develop special medical treatments and to unravel scientific and medical mysteries.

GEMS OF THOUGHT

OBEDIENCE

The reward is in keeping the commandments, not for keeping them. — Lydia Maria Child.

Perfectly conformity to the will of God is the sole sovereign and complete liberty. — D'Aubigne.

Obedience is the offspring of Love; and Love is the Principle of unity, the basis of all right thinking and acting; it fulfils the law. — Mary Baker Eddy.

No man can always do just as he chooses until he always chooses to do God's will; and that is heaven. There is no liberty in wrongdoing. — Joseph Cook.

All the good of which humanity is capable is comprised in obedience. — John Stuart Mill.

We need only obey. There is guidance for each of us, and by lowly listening we shall hear the right word. — Emerson.

CHINESE INGENUITY

More than 3,000 years ago the Chinese were making protective coatings with various materials; lacquer was long a Chinese specialty, it is claimed.

Liberty Cap, the cone of an extinct hot spring in Yellowstone Park, is 3,200 years old. Its age has been determined through the minute quantities of radium it contains; 2680

Veteran Students

Prove Outstanding For Their Academic Ability

To further substantiate the efforts being made by veteran students in schools throughout Canada the district office in Edmonton recently received the following letter from N. N. Bentley, Principal, Vermilion School of Agriculture:

"I would like to take this opportunity to advise you that the veterans in attendance at this school have been outstanding for their academic ability, as well as for their participation in athletic, social and literary activities conducted under the Students' Union."

How to Combat RHEUMATIC PAIN

Rheumatic pains may often be caused by excess uric acid, a blood impurity that should be extracted by the kidneys. If kidneys fail, and excess uric acid remains, it may cause severe discomfort and pain. Treat rheumatic pains by keeping your kidneys in good condition. Get and use Dodd's Kidney Pills. Dodd's help your kidneys get rid of trouble-making poisons and excess acids—help you feel better. See what Dodd's can do for you. 137

Everybody's Problem

People Should Realize Farmers' Troubles Affect Whole Community

It has been long noted that the farmer is one of the greatest of gamblers, says the London, Ont., Free Press. He is dealing constantly with a complex of forces most of which are out of his control. But sometimes we forget that we are all partners in his gamble. If the turn of the dice, in this case the weather, goes against the farmer it may well be that many of the rest of us will go hungry. Accordingly, we should realize that the farmers' problems are problems for the whole community.

Radium's radioactivity lasts for centuries, and is only about half dissipated after 2,000 years.
